LEARN THE LATEST TECHNOLOGY FOR HOT WATER ELECTRONIC DEMAND DISTRIBUTION CONTROLS

ACT, Inc. is proud to sponsor an AIA and GBCI Continuing Education course provided by GreenCE, Inc. titled [Understanding Structured Plumbing: How to Use Demand Control Systems \(GAC15B\)](#).

First, I want to thank you for taking the course in the past 24 months. This new GreenCE course is the most recent development of D'MAND KONTROLS® and STRUCTURED PLUMBING® for hot water distribution in residential, commercial and multi-family projects, both new construction and existing buildings. Even though you may have taken the previous course, this new updated version will allow you credit for 2016 as well. More important, is the development of new technology shown in the new course.

You will need your account to sign in with and to start the course.

We, at ACT INC. D'MAND KONTROLS® SYSTEMS would like to wish you and your families the best of holidays and a successful 2017.
